General Specifications
GS 33J60F52-01EN

Models ANT411, ANT512
Optical ESB Bus Repeater Modules for 5 km to 50 km
(for N-IO/FIO)

**GENERAL**
The Optical ESB Bus Repeater Module for 5 km to 50 km converts the ESB bus to an optical signal and transmit it. The ESB bus transmission distance can be extended within the range from 5 km to 50 km by connecting the ANT411 Optical ESB Bus Repeater Master Module and ANT512 Optical ESB Bus Repeater Slave Module with an optical fiber cable.

The ESB bus transmission distance can be extended within the range of 5 km to 50 km by connecting the ANT411 Optical ESB Bus Repeater Master Module to A2EN501 N-ESB Bus Repeater Slave Module and A2EN501 N-ESB Bus Repeater Slave Module to ANT512 Optical ESB Bus Repeater Slave Module with an optical fiber cable.

**ANT411 Optical ESB Bus Repeater Master Module for 5 km to 50 km**
This module can be installed in the Field Control Unit (AFV30□/AFV40□/A2FV50□/A2FV70□), Unit for Optical ESB Bus Repeater Module (ANT10U), ESB Bus Node Unit (ANB10□), and Optical ESB Bus Node Unit (ANB11□).
To connect the ANT411 to the ESB bus, specify “Connector unit for ESB Bus” (option code “/CU1N”).
To terminate the ESB bus at the ANT411, specify “Connector unit with terminator for ESB Bus” (option code “/CU1T”).

**ANT512 Optical ESB Bus Repeater Slave Module for 5 km to 50 km**
ANT512 is installed as standard in the Optical ESB Bus Node Unit (ANB11□) as a slave module of the optical ESB bus. It can also be installed in the Unit for Optical ESB Bus Repeater Module (ANT10U).
To connect the ANT512 to the ESB bus, specify “Connector unit with ESB Bus connector” (option code “/BU1A” or “/HU1A”). To not connect the ANT512 to the ESB bus, specify “Connector unit” (option code “/BU1B” or “/HU1B”).
To monitor the temperatures and fans in the cabinet, specify “With HKU interface” (option code “/HU1A” or “/HU1B”).

**Installation Position**
The following table shows the units and numbers of slots in which the ANT411 and the ANT512 can be installed.

For the installation positions corresponding to the slot numbers, see “FIO System Overview” (GS 33J60A10-01EN), “N-IO System Overview” (GS 33J62A10-01EN), and “Field Control Unit, Cabinet Utility Kit (for RIO System Upgrade)” (GS 33J64E10-01EN).

**STANDARD SPECIFICATIONS**

Function: ESB bus optical transport  
Topology: chain and star connection  
Maximum number of hops:  
- 2 hops (for chain connection)  
Maximum number of hops for each FCU (*1):  
- AFV30 or AFV40: 8 hops (for chain and star connection)  
- A2FV50: 16 hops (for chain and star connection) (*2)  
- A2FV70: 8 hops (for chain and star connection)  
Maximum transmission distance: 50 km (one hop)  
Optical connector type:  
- LC (IEC61754-20-compliant)  
Number of optical fiber cores: 2  
Current consumption: 0.5 A  
Weight: Approx. 0.25 kg (main body only)

*1: The number of paired connection between Master Module and Slave Module.  
*2: Up to 24 hops are possible only when A2FV50 is used for FCU and star connection is configured with ANT411 via EC402. (Supported by CENTUM VP R6.06 or later.)

● **Optical Fiber Cable Specifications**

<td>2</td>
<td>Quartz single-mode optical fiber (*2)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>50 km</td>
<td></td>
</tr>
</tbody>
</table>

*1: When the optical attenuation between the ANT411 and ANT512 is less than 3 dB, use the attenuator to reduce the attenuation by 3 dB.  
*2: JIS C 6835 SSMA-9.3/125 or IEC 60793-2-50 B1.1 type

● **HKU Interface (ANT512 Option) (*1)**

When ANT512’s option code /HU1A or /HU1B is specified, the environmental information of the cabinet where the modules are installed can be transmitted to FCU via optical ESB bus.  
The FCU monitors the connected cabinet’s environmental conditions and displays HKU’s operating status as well as system alarm on HIS.  

*1: HKU Interface is only available in case of configured with AFV40 or AFV30 is installed in the Rittal cabinet by using ACUKT1 Cabinet Utility Kit.
## EXTERNAL DIMENSION

- Optical ESB Bus Repeater Master Module for 5 km to 50 km (ANT411)

Nominal Tolerances:
Nominal tolerance is ± 0.8 mm for the dimensions of 0.5 mm or more and 120 mm or less, and the combined nominal tolerance is ± 1.5 mm.
The nominal tolerance is in accordance with JEM 1459 for the dimensions over 120 mm.
Optical ESB Bus Repeater Slave Module for 5 km to 50 km (ANT512)

**RESTRICTIONS AND CAUTIONS FOR INSTALLATION**

- Dual-redundant modules should be installed in a pair of continuous slots.
- The module for ESB bus 1 should be installed in an odd-numbered slot, and the module for ESB bus 2 in an even-numbered slot.

Nominal Tolerances:
Nominal tolerance is ± 0.8 mm for the dimensions of 0.5 mm or more and 120 mm or less, and the combined nominal tolerance is ± 1.5 mm.
The nominal tolerance is in accordance with JEM 1459 for the dimensions over 120 mm.
EXAMPLE OF CONNECTION STRUCTURE

- Example of Chain and Star Connection (In the case of A2FV50□/A2FV70□ for FCU)

*1: Connectable Node Interface Unit
A2NN30D for A2FV50D
A2NN10D or A2NN20D for A2FV70D

Figure Example of Chain and Star Connection (In the case of A2FV50□/A2FV70□ for FCU)
**Example of Chain Connection (In the case of AFV30□/AFV40□ for FCU)**

Max. length of Fiber-optic cable 5 km

Total Max. length of Fiber-optic cable 50 km

Max. length of Fiber-optic cable 50 km

ANT411: option code “/CU1T”
ANT502: option code “/HU1A”

ANT512: option code “/HU1B”

*: A dual-redundant configuration is enabled by using 2 identical modules with same model code (CP461 or CP471).

Figure  Example of Chain Connection Using HK Function
Example of Star Connection (In the case of AFV30□/AFV40□ for FCU)

- ESB bus cable Max. length: 10 m (*2)
- Max. length of Fiber-optic cable 5 km
- Max. length of Fiber-optic cable 50 km

**Figure  Example of Star Connection Using HK Function**

*1: A dual-redundant configuration is enabled by using 2 identical modules with same model code (CP461 or CP471).

*2: The above diagram shows an example of ESB Bus wiring and its termination. The wiring can be done from left to right or vice versa in between EC401 and ANT401 and among ANT401 modules.
## MODEL AND SUFFIX CODES

### Optical ESB Bus Repeater Master Module

<table>

</tbody>
</table>

### Option Codes

- **/CU1N** Connector unit for ESB Bus
- **/CU1T** Connector unit with terminator for ESB Bus
- **/BU1A** Connector unit with ESB Bus connector
- **/BU1B** Connector unit
- **/HU1A** Connector unit with ESB Bus connector and HKU I/F
- **/HUB1** Connector unit with HKU I/F

### Note

When Optical ESB bus repeater modules are connected via Optical ESB bus, the master side must be paired with one of the slave sides as described below:

- ANT411-0 or -3 for master side and ANT512-0, -3, ANB11S-3, ANB11D-3 for slave side
- ANT411-E or -F for master side and ANT512-E, -F, A2EN501-E, A2EN501-F for slave side
- A2EN501-E for master side and ANT512-E or -F for slave side

When using by dual-redundant configuration, the module for ESB bus1 should be the same as the module for ESB bus2.

### APPLICABLE STANDARDS

Refer to the GS “Integrated Production Control System CENTUM VP System Overview” (GS 33J01A10-01EN).

### ORDERING INFORMATION

Specify the model and suffix codes when ordering.

For selecting the right products for explosion protection, please refer to TI 33Q01J30-01E without fail.
